

# GUIDELINES FOR AUTHORS OF PAPERS

## Seminar on Gender and Access in South Asia

Dhaka, Bangladesh November 2006

- IUSSP Copyright* Papers presented must not have been published previously. The IUSSP retains intellectual property rights over papers prepared for presentation at IUSSP-sponsored events.
- Website Publication* Papers will be posted on the IUSSP website before the scientific event takes place on a password protected section of the website restricted to members.
- Submission* Papers should be submitted as Word documents only and must be smaller than 2 megabytes. They will be converted to pdf files before being posted on the website.
- Format* Papers should be formatted in such a way that they can be read with ease. Please use the same standard 12-point font throughout the manuscript and number all pages beginning with the title page. All margins should be 3 cm and the text left-justified and in 1.5 line spacing throughout.
- Title Page* Title of the paper, in font size 18 bold and centred, should be positioned at the top of the page, followed by authors' names and affiliations, centred in font size 12, and by the title and date of the IUSSP seminar at which the paper will be presented.
- Spelling* Spelling is according to the *Oxford English Dictionary*.
- References* All references should be given in a single alphabetically ordered list at the end of the paper. In the text of the paper, all citations should be placed in parentheses with semicolons separating different works, e.g., (Höhn 1985), (Ryder 1985, Ch. 2; Smith 1977, 25-9). Carefully check the consistency of items in the list of references and citations in the text.
- Distinguish publications in the same year by a single author or identical list of coauthors, by adding a, b, etc to the year (1984a, 1984b). Arrange citations of the same author or list of coauthors from the earliest year to the latest.
- Please adhere to the following styles:
- For books* Dahrendorf, R. 1975. *The New Liberty*. Routledge and Kegan Paul, London.
- For articles in periodicals* Hill, K. and J. Trussell. 1977. Further developments in indirect mortality estimation. *Population Studies* 31: 2-15.
- For articles in books* Ledent, J. 1982. Transition probability estimation in increment-decrement life tables, in K.C. Land and A. Rogers (eds.), *Multidimensional Mathematical Demography*, Academic Press, New York, pp. 347-84.
- Unpublished works, reports, and theses* Brass, W. 1984. Mortality in China over the past fifty years: Indirect estimates from the 1982 census. Paper presented to the International Seminar on China's 1982 Population Census, March 1984, Beijing.
- Footnotes* This referencing system reduces the number of footnotes, which should be limited to additional remarks not included in the text. Footnotes should be numbered consecutively from the first to the last page of the paper.
- Additional tips to help control the size of your file*
- Limit the number of complicated figures, embedded images, graphs and tables you include in the file;
  - If including tables, use Word tables or paste Excel tables into the Word document;
  - If including images or graphics, try to reduce the number of colours used, use .gifs or .jpps rather than .bmps, and use the latest version of Word possible (Word 2000 or XP instead of Word 1997); and
  - Avoid scanning text or figures.
- For more tips on reducing file size, including how to change .bmp graphics into .gifs and convert text from PowerPoint and html to Word, please consult the websites:
