

TENURE-TRACK ASSISTANT/ASSOCIATE/FULL PROFESSOR

The UCLA California Center for Population Research (CCPR) is seeking candidates for a full time tenure-track position in demography and population studies. This is an open rank faculty appointment with rank depending on the candidate's experience and record. The department in which the appointment is made will be based on the candidate's discipline and departmental preferences, but will most likely be made in one of the major departments represented within CCPR (Economics, Sociology, Community Health Sciences, Geography, and Public Policy). Candidates should have an active research program in areas related to demography and population research and the ability to teach high quality required and elective courses. We are especially interested in candidates whose research and teaching focuses on one or more of the following areas: demographic aspects of ethnicity, discrimination, social class, income inequality, and social and geographic mobility; economic and social disparities in health and the effects of health on socioeconomic status; adolescence, young adulthood, and youth at risk; aging, retirement, and the elderly population; population and the environment. Research may focus on the United States, other countries, or both. Strong preference will be given to candidates who show evidence of interdisciplinary research and/or interest in communication and collaboration among disciplines.

Applicants must have an earned doctorate in a social science, public policy, public health, demography, or a related field. Preference will be given to candidates with graduate training in demographic methods, theory, and research. Responsibilities include teaching required and elective courses in the department in which the appointment is made, student advising, maintenance of a strong and innovative research program, active participation in the CCPR Demographic Training Program, and participation in CCPR, departmental, and campus-wide committees. Candidates are expected to have extramurally funded research or (for junior candidates) to show evidence that they will compete successfully for extramural research funding in the future. The preferred start date for this position is academic year 2009-10. Applications will be accepted until the position is filled.

Established in 1998, the California Center for Population Research (CCPR) is one of the leading population studies centers in the United States. Research by CCPR affiliates is focused both domestically and internationally. This NIH-funded center comprises over 60 active faculty researchers from the disciplines of anthropology, economics, epidemiology, geography, law, management, medicine, pediatrics, policy studies, population, psychology, public health, social welfare, sociology, and urban planning. CCPR provides a vibrant and interdisciplinary intellectual environment for population-related research and training and excellent services that support these endeavors. For more information on CCPR see www.ccpr.ucla.edu.

Applications, including a letter of interest and CV should be sent to:
